\$299,900

Fabulous Renovation of 1902 Four Square!

Every now and then a quality renovation of a wonderful old home is done with loving care by a builder who knows what they are doing. When you view these homes side by side with a quick makeover type renovation, it's like comparing chalk with cheese! Here is one of those careful renovations completed in 2004/05 and improved upon by the current sellers who have carefully updated the kitchen since to include granite counter-tops and stainless appliances! From shining wood floors, to fabulous modern table space kitchen, huge fenced and landscaped rear yard, this home shows care and attention to detail. Central Air Conditioning and gas radiator heat are featured. There are 3 finished levels with a full bathroom on each one! Grand sized dining room flows to bright living room w/library/den to one side. Upstairs two big bedrooms and in the finished lower level are two more, both near a remodeled bathroom. The front porch is a great place to spend warm Summer evenings and view the wonderful street with attractive houses of varied styles and sizes. This is one of the nicer blocks of the City of Mount Rainier!
